

Econwings

International Distribution of Nera Plant Products

To whom it may concern

Letter of Intent

On behalf of Econwings, International Distribution Partner of Bio Nera Plant Product Range

We are honored to represent Nera Plant products range in key countries outside Romania.

Our mission is to make this unique products range available to as many families as possible, as we strongly believe in the healing power and prevention capabilities of ancient monastic plant mixtures and plant processing methods. Few keepers of tradition have remained over years and Nera Monastery (Caras-Severin County, Romania) is between these few. The community of 110 nuns, highly educated in medical sciences and under the guidance of renowned phytotherapy practitioners and holistic medicine doctors, have created during the past 25 years a unique, premium range of products, that form three main categories: 1/ Health support and prevention; 2/ Cosmetics; 3/ Food products.

Nera Plant products have as unique features hand-picked natural ingredients and internationally accredited processing methods and equipment. For detailed information of the accreditation sets of Nera Plant products, please visit the bottom-line section of the website: <https://neraplant.ro>.

With this letter we would like to express formally our cooperation interest with your company, so that your customers could also benefit from these unique products range.

Looking forward to starting a strong and successful business relationship,

Sincerely yours,

Marian Serbulea - Business Development Partner Econwings
