Founder & Managing Director

Company Future Focus Infotech

Email: mani@focusite.com

Profile:

A pioneer in India's IT staffing business, Future Focus Infotech Pvt. Ltd. (FFI) offers Strategic IT consulting and Managed Solutions to Technology companies. Incorporated in 1997, FFI has transformed over the years to become a leader in Consulting for myriad technologies ranging from application development using Open Source, Microsoft, Java and Mainframe technologies to state-of-the-art SMAC technologies. A Software Development Center (SDC) established in 1999 caters to the growing needs of our International clients offering Application Support services and managed solutions in Quality Assurance (QA), Business Intelligence (BI) and Analytics. Primarily to cater to our Indian clients in their overseas projects, we have spread our wings to establish offices in the USA (Focus America Inc) in 2000 and in UAE (Future Focus Infotech FZE) in 2011.

Our subsidiaries, with clear understanding of the local milieu, have now the capability to service the local clients effectively. FFI today operates across 8 major cities in India apart from the overseas operations. The scale of our capabilities, offerings and customer engagements in the IT & ITES domain differentiates us from other companies in the consulting and recruitment vertical. FFI, ISO 9001 certified since 2005, with its focus on quality delivery, has not only been successful in retaining its major clients but also in securing additional business in new geographies. FFI maintains excellent relationship with its consultants too resulting in consistent repeat business over the years.

Dizruptive AI is the cutting edge, Artificial Intelligence focused firm that provides cutting edge solutions in Manufacturing and Healthcare.

Mr. Gopi Koteeswaran also chairs the SICCI Entrepreneurship Innovation and Startup Committee.

Name: **Dr. Priya Chockalingam**

Designation: Director

Company Cardiac Wellness Institute

Email: priya.chockalingam@gmail.com

Profile:

The aim of Cardiac Wellness Institute is to reduce death, disability and suffering caused by cardiovascular diseases. We believe that this can only be achieved by educating people, providing them with cutting edge treatment facilities and involving them in their long-term disease management.

Heart disease, diabetes, cancers and chronic respiratory diseases can be prevented to a great extent by eliminating the shared risk behaviors namely tobacco use, unhealthy diet, physical inactivity, stressful lifestyle and the harmful use of alcohol. Being well informed about the impact that specific lifestyle choices have on our health is crucial in the process of making the most appropriate choices for our wellbeing.

With our highly skilled and experienced team guiding you, it will be a dream come true when you reach your health goals and make progress in your journey to a healthy life. And for us at Cardiac Wellness Institute our goals are clear; empower you to take control of your health and show you the path to lifelong wellness. With the state-of-the-art facilities at our centre, together with the commitment and dedication of our professionals, we are confident that we can help you get better.

We constantly strive to ensure the comfort and safety of our clients and at the same time are sensitive to their social, cultural and religious needs. We take feedback seriously, considering it as a cornerstone for improving our services. We focus on the following four stages of prevention to reduce disease severity and improve people's health-related quality of life.

Name: **Mr. Manikandan S**

Designation: Founder & Director

Company Spero Mobility and Energy Solutions Private Limited

Email: sm@speroelectric.in

Profile:

Spero (hope in Latin) is part of the small team's dream to introduce sustainable mobility in India taking cues from India's National Electric Mobility Mission Plan (NEMMP 2020). We froze on pedelecs (pedal electric cycles) as a niche to enter the evolving electric mobility sector owing to memorable experiences riding them through the cities of Italy and New Zealand.

Access to captive design and manufacturing facilities emboldened manufacture of prototypes with locally available and imported materials by end 2015. Continuous testing and deeper understanding of BL (brushless) DC motors, power electronics, sensors and lithium storage enabled freeze of the first commercial variant in less than 12 months.

The required dies, fixtures and overseas collaborators were put together to launch e-series range with 3 mileage variants and in 3 colours by mid-2017. The timely delivery of the crowd funded pedelecs by mid-2017 led the company to focus on developing the right variant for the growing e-commerce and last mile-delivery companies. Working with India's large companies, trials across 4 states resulted in the launch of c series with custom cargo holding options.

SPERO has been designing and integrating its own battery packs in varied form factors and capacities with support from global cell and BMS manufacturers. With the knowledge built over the years, we currently cater to demand for storage solutions in non-conventional energy production, industrial applications, fossil fuel powered automobiles and domestic appliances.

Name: **Mr. Alex T Koshy**

Designation: Partner

Company SAS Partners Corporate Advisors Pvt Ltd
