

Public call

In line with the policies of the thirteenth government of Iran and also the new programs of the Ministry of Energy, Renewable Energy and Energy Efficiency Organization of Iran (SATBA) intends to use the capacity of "Article 12 of the Law on Removing Barriers of Competitive Production and Improving the Financial System of the Country" to develop and build 10,000 MW of renewable power plants with the help of the private sector.

All domestic and foreign interested parties and investors are invited to participate in this issue and send their proposals to SATBA by observing the following conditions.

- Construction of a solar power plant with a capacity of at least 10 MW
- Construction of wind power plant with a capacity of at least 50 MW.
- Construction of other renewable power plants without capacity limitation

Answers should be sent in writing and no later than November 21, 2021 to the address of:

"SATBA Building, Niroo Research Institute, Western End of Dadman Blvd., Shahrak-e-Qods, Tehran, IRAN"

Or email of: "Info@satba.gov.ir".
